

J U L Y 2006

## I'M A FAN

I ordered the new 7-disc box with Bjork the other day and the Klaus Kinski dvd-box is waiting at the post office as well. **Play.com** is becoming a good friend of mine.

When Sweden went out of the WC 2006 last month, it was just bloody disappointing. Losing to Germany is one thing, but the way they did it was pathetic. Freddie Ljungberg was one of the few who gave 100% through the whole tournament.

Right now I'm listening to the new Tool cd and some 70's Elton John albums. He had an incredible voice in those days, him & Bernie Taupin sure wrote some classics.

## THERION TIME

*This week Therion start recording their new album, I'm looking forward to the recording process.*

Two years ago I did my first show with Therion, in a few weeks I'll start recording vocals for their new album. Compared to the last album (where I only sang a few songs) I'll provide more different kinds of voices and might also sing some backing vocals.

I wrote one song and provided melodies for other songs, don't know what will end up on the album though.

Not allowed to say too much about the album yet, but there are more songwriters involved on this one than before - could end up pretty diverse.

Some of the previous albums with Therion really have sounded crap. I'm expecting the new album to be the best sounding so far, very talented and experienced people involved this time during recording & mix.

Can't tell you too much about the upcoming tour except that it starts in January 2007 and that it will be a new experience compared to the last tour for the fans. We'll definitely play South America sometime during 2007, I'd really like to tour North America as well but it's a costly affair for the band, so I don't know yet...

A last tip...if **Danko Jones** plays your town, don't miss it!

The Canadian invaded Gothenburg's Metal Town festival last week with true rock 'n' roll power.

Is *Midnight Cowboy* a great movie or what?

Dustin Hoffman & Jon Voight directed by John Schlesinger (who was slowly coming out of the closet at the time) - go rent it or buy it.

According to Leif, the new **Krux** album will hit the stores in late September.

Don't know about gigs yet, but most likely we'll play a release gig in Stockholm.

We had problems with the studio last week, so the **S&M** songs never got recorded. Maybe we can do it the next time I'm down in Gothenburg in August.

Will also mix 3 songs with another interesting project when I'm there...
